

The OSINT-as-Lead-Gen Roadmap

Eudaimonia, Asymmetric Value, and the Structural Moat

paulamerigo.pajojr@benilde.edu.ph

The Core Shift in B2B Trust Mathematics

paulamerigo.pajojr@benilde.edu.ph

The Old Instinct

Hide the edge.

Protect proprietary data.

Charge for basic visibility.

Result:
Rapid commoditization.

**Turn proprietary operational
signal processing into
asymmetric public value.**

The New Geometry

Amplify the public signal.

Give away the "what happened."

Charge only for execution.

Result: The OSINT Flywheel.
Paid execution becomes the
high-margin outcome.

Destroy Competitor Value, Qualify Leads

paulamerigo.pajojr@benilde.edu.ph

Revenue Without Trust is Fragile

Reciprocity Loops vs. Transactional Funnels

paulamerigo.pajojr@benilde.edu.ph

Traditional Funnel

"When a professional relies on your free dashboard to make a critical decision, they do not feel marketed to; they feel indebted."

OSINT Reciprocity Loop

The OSINT Maturity Model

Phase 0: Zero-to-Observable (Weeks 0–6)

- ✓ **Launch Static OSINT Hub** (Next.js/Carrrd)
- ✓ **Publish Weekly Snapshots**
(Machine + human readable; public sources only)
- ✓ **Narrative Synthesis**
(Tie data to 2nd-order effects, e.g., crew refusal loops)
- ✓ **The Evergreen Explainer**
(Plain language dynamics + simple diagrams)
- ✓ **Syndication Flywheel**
(Turn updates into 8-tweet threads / LinkedIn carousels)
- ✓ **The Offer: Zero-Friction “Continuity Accelerator” Pilot** (48-hour surge pods)

Kahampatan Overlay:

Build Kapwa:
End updates with a micro-practice question.
("Who in your network needs a 5-min check-in today?")
Builds quiet trust.

Goal: Create a 1–3 minute read that makes visitors think, “This is the clearest free signal on real industry friction right now.”

Phase 1: Signal Amplification (Weeks 6–24)

Kahampatan
Community
Signal Loop

Public anonymous form for unusual quotes/friction. Embodies Bayanihan (neighbors leaving doors unlocked to share resources).

paulamerigo.pajojr@benilde.edu.ph 2% opacity at 2%

Free Broad Signal

**Gated
Sharper Signal**

Conversation

Gated “Deeper Cut” Tier

Require email to unlock historical CSVs & 1-month ML forward-looking nowcasts.

The Post-Submit Pivot

“Most users who need this data also need exception handling at scale → book a 15 min call.”

Risk-Adaptive Workflows & Volatility Staffing

Packages allowing $\pm 50\%$ capacity swings.

Phase 2: Commercial Layer Activation (Months 6–18)

Top of Funnel
Public Traffic

"We turn these public signals into automated workflows **40–70% faster** than onshore teams."

The Execution Delta:

Use signals for free; pay only when we execute the messy 20%.

White-Label / API Freemium:

Paid tier for high-frequency behavioral-friction index webhooks.

Adjacent Vertical Seeding:

Share OSINT framing with adjacent sectors (e.g., energy vs. logistics).
"Same signals, different execution pain."

Kahampatan Overlay

Align with Ayta principle of "taking just enough." Extract no rent from basic visibility; charge only for heavy labor that genuinely relieves burdens.

Phase 3: Structural Moat via Public Dominance (Months 18+)

Goal: Transition from useful tool to **indispensable** industry layer.

Kahampatan Overlay

Ultimate moat is **Pagkatao (reputation)**. The startup's flourishing is inextricably linked to the resilience of the global supply chain.

Minimum Viable Tech Stack

paulamerigo.pajojr@benilde.edu.ph

Measuring the Geometry of Trust (North Stars)

Anonymity Surrender Rate

Hub Sessions → Form Fills (>12%)

Indicates free signal is valuable enough to trade anonymity.

Inbound OSINT Attribution

Demo pipeline (>40%)

Proves updates drive the sales pipeline.

Community Submissions

WoW Growth

Validates the Bayanihan network effect during crisis periods.

Net Relationship Quality

Free-tier to paid/referrals

Conversion rate. Measures trust compounding.

paulamerigo.pajojr@benilde.edu.ph

Build Your OSINT Engine Blueprint

paulamerigo.pajojr@benilde.edu.ph

- 1. The Catalyst:** [Target Persona] is facing severe disruption due to [Specific Crisis].
- 2. Asymmetric Value:** Build a free hub tracking [Behavioral Data Points] paired with an offer for [48-hour Surge Capacity].
- 3. The Gated Cut:** Require email to unlock [Forward-Looking Nowcast/CSV].
- 4. Execution Delta:** Sell the messy execution of [Complex Workflow] and offer API access to [Adjacent Stakeholder].
- 5. Structural Moat:** Expand hub to cover [Future Crises] and institutionalize workflows across the [Target Industry] ecosystem.

“The ultimate moat is not proprietary data; it is pagkatao (reputation) and embedded relational trust.”

paulamerigo.pajojr@benilde.edu.ph

**Build the signal. Serve the ecosystem.
Execute the exceptions.**
